There is a wonder and magic to childhood. We don't realize it at the time, of course . . . yet the adults in our lives do. They encourage us to see things in the stars, to find joy in colors and laughter as we play. But what happens when that special someone who encourages such wonder and magic is no longer around? We can hide, we can place our heart in a bottle and grow up . . . or we can find another special someone who understands the magic. And we can encourage them to see things in the stars, find joy among colors and laughter as they play. . . . Oliver Jeffers delivers a remarkable book, a tale of poignancy and resonance reminiscent of *The Giving Tree* that will speak to the hearts of children and parents alike.

This heartwarming book encourages positive behavior by using the concept of an invisible bucket to show children how easy and rewarding it is to express kindness, appreciation and love by "filling buckets." Updated and revised, this 10th anniversary edition will help readers better understand that "bucket dipping" is a negative behavior, not a permanent label. It also explains that it's possible to fill or dip into our own buckets.

As a young girl in Kenya, Wangari was taught to respect nature. She grew up loving the land, plants, and animals that surrounded her -from the giant mugumo trees her people, the Kikuyu, revered to the tiny tadpoles that swam in the river. Although most Kenyan girls were not educated, Wangari, curious and hardworking, was allowed to go to school. There, her mind sprouted like a seed. She excelled at science and went on to study in the United States. After returning home, Wangari blazed a trail across Kenya, using her knowledge and compassion to promote the rights of her countrywomen and to help save the land, one tree at a time. *Seeds of Change: Planting a Path to Peace* brings to life the empowering story of Wangari Maathai, the first African woman, and environmentalist, to win a Nobel Peace Prize.
